

## An Annotated Checklist of the Bruchidae of Honduras

Robert H. Turnbow, Jr.<sup>1</sup>, Ronald D. Cave<sup>2</sup> and John M. Kingsolver<sup>3</sup>.

**Abstract.** An annotated list of the Bruchidae of Honduras is presented. One hundred forty eight species, including 78 species previously unrecorded from the country, are reported. Detailed collection data are presented for those species recorded from Honduras for the first time.

**Key words:** Coleoptera, species, new country records

**Resumen.** Se presenta una lista anotada de la familia Bruchidae de Honduras. Se reportan 148 especies, incluyendo 78 especies no previamente reportada del país. Se presentan los datos detallados de recolecta para aquellas especies registradas de Honduras por la primera vez.

**Palabras clave:** Coleoptera, especies, nuevos registros nacionales.

### Introduction

The Bruchidae, commonly called seed weevils, are a diverse family of beetles whose larvae develop within the seeds of plants. Johnson and Kingsolver (1981) provided a list of species in North and Central America and the West Indies, in which ten species were mentioned as specifically occurring in Honduras.

Since that time, particularly from 1988 until 2002, the first two authors, their colleagues, and students and field assistants of Ronald D. Cave (while at the Escuela Agrícola Panamericana, Zamorano) carried out intense efforts of sampling the Honduran beetle fauna and amassed a large collection of bruchids throughout the country and at all times of the year. The taxonomic expertise of John M. Kingsolver was solicited to put species names on specimens.

Herein we present a list of the 148 species of

Bruchidae that are known to occur in Honduras. Only described species whose specimens' identities can be established with a degree of certainty are included. Specimens with tentative species identifications and specimens of species that are apparently undescribed are not included in the present list.

Species previously recorded from Honduras are listed with the earliest located literature record being cited. New department records for these species are indicated by (NR). For species not previously recorded from the country, label data from all available specimens are presented. Label data are presented verbatim (department name in bold) except dates are standardized (month expressed as a Roman numeral-day(s)-year expressed as a two digit character). For a specimen whose data are cited, the coden of the collection in which it is housed is given in parentheses. Collections accessed and their codens are as follows:

<sup>1</sup> Ph.D., ATZQ-DEL-PC, 1120 Dilly Branch Road, Ft. Rucker, AL 36362-5105, turnbowr@rucker.army.mil

<sup>2</sup> Ph.D., Indian River Research and Education Center, University of Florida, 2199 South Rock Road, Fort Pierce, FL 34945, rdcave@ifas.ufl.edu

<sup>3</sup> Ph.D., Florida State Collection of Arthropods, Division of Plant Industry, P.O. Box 147100, Gainesville, FL 32614-7100, bruchid@aol.com

Escuela Agrícola Panamericana, Zamorano (EAPZ); Florida State Collection of Arthropods, Gainesville (FSCA); Fred W. Skillman, Jr. private collection (FWSC); Gary V. Manley private collection (GVMC); James E. Wappes private collection (JEWG); Ronald D. Cave private collection (RDCC); Robert H. Turnbow, Jr. private collection (RHTC). Emendations of the authors are shown in brackets. New data are chronologically arranged by date of collection under each species heading. Genera are presented alphabetically within subfamilies; species are presented alphabetically within genera.

## List of Species

### Pachymerinae

1. *Caryobruchus chiriquensis* (Sharp, 1885)  
Yoro, Parq[ue] Nac[ional] Pico Bonito, Montaña de Santa Bárbara, N15°32'W86°48', XI-12-00, A. Hernández (RDCC).
2. *Caryobruchus glediisiae* (Linnaeus, 1763)  
(Nilsson and Johnson, 1993), Olancho (NR).
- 3! *Pachymerus cardo* (Fähræus, 1839)  
Atlántida, RVS Cuero y Salado, Salado Barra 2 m, N15°46'W87°00', VIII-31-00, C. Cantarero (RDCC); Atlántida, Parq[ue] Nac[ional] Pico Bonito, Estación CURLA 175 m, N15°42'W86°51', I-26-02, F. Martínez (RDCC).

### Amblycerinae

4. *Amblycerus alternatus* (Pic, 1954)  
Francisco Morazán, El Zamorano 850 m, V-4-10-90, R. Cave (EAPZ); Francisco Morazán, Zamorano, V-13-02, R. Turnbow (RHTC); *ibid* V-22-02; *ibid* V-23-02.
5. *Amblycerus anosignatus* (Chevrolat, 1877)  
Santa Bárbara, Ilama, La Fe, X-31-92, R. Cave (RDCC); Santa Bárbara, vic[inity] Zacapa, V-30-93, R. W. Skillman, Jr. (FSCA, EAPZ).
6. *Amblycerus biolleyi* (Pic, 1954)  
Atlántida, Parq[ue] Nac[ional] Pico Bonito, Río Zacate 35 m, N15°41'35"W86°55'58", III-5-00, Cave, Cordero & Torres (RDCC).
7. *Amblycerus cerdanicola* Kingsolver, 1970

Francisco Morazán, San Antonio de Oriente, El Zamorano, IV-5-15-90 (RDCC); *ibid* IV-12-19-90, R. Cave; *ibid* V-4-10-90; *ibid* V-11-17-90; *ibid* V-24-90; *ibid* VI-7-90; Choluteca, Choluteca, Cerro Guanacaure, VI-4-93, R. Cave (RDCC); *ibid* R. Turnbow (RHTC); Yoro, Parq[ue] Nac[ional] Pico Pijol, 15°10'N 87°35'W, VII-13-96, RD Cave (RDCC); Atlántida, Parq[ue] Nac[ional] Pico Bonito, Río Zacate 35 m, N15°41'35"W86°55'58", III-5-00, Cave, Cordero & Torres (RDCC); Cortés, 1.4 km S Chivana, on rd to Jalisco 140 m, N15°46'24"W87°59'52", IV-29-30-00, RD Cave (RDCC); Atlántida, P[arque] N[acional] Pico Bonito, Río Zacate, mv + bl, VII-19-01, R. Turnbow (RHTC); Atlántida, Parq[ue] Nac[ional] Pico Bonito, Río Zacate 35 m, N15°41'35"W86°55'58", IV-11-02, RD Cave (RDCC); Francisco Morazán, Zamorano, V-13-02, R. Turnbow (RHTC); *ibid* V-22-02 (RHTC); *ibid* V-23-02; *ibid* V-27-02; *ibid* VI-1-03 (FSCA); *ibid* VI-8-03; *ibid* VI-13-03; Islas de la Bahía, Isla Roatán, West End, VI-29-02, RD Cave (RDCC); Yoro, P[arque] N[acional] Pico Pijol, mv + bl, VI-2-03, R. Turnbow (FSCA); Yoro, Sinai, 1450 m., mv + bl, VI-4-2003, R. Turnbow (RHTC).

8. *Amblycerus championi* (Pic, 1885)  
Atlántida, P[arque] N[acional] Pico Bonito, Río Zacate, VII-17-01, R. Turnbow (RHTC).
9. *Amblycerus cistelinus* (Gyllenhal, 1833)  
Francisco Morazán, San Antonio de Oriente, El Zamorano, V-14-89, RD Cave (FSCA, RDCC); *ibid* VII-10-89; Francisco Morazán, 2.8 km NW Zambrano, VII-21-89, RD Cave (RDCC); Yoro, 2 km E El Negrito, VII-23-89, R. Cave (EAPZ); Francisco Morazán, San Antonio de Oriente, Uyuca, V-11-17-90, R. Cave (RDCC); El Paraíso, Cerro Monserrat, Yuscarán, 1780 m, IV-1-15-93, R. Ortega (EAPZ); El Paraíso, vic[inity] Yuscarán, V-25-93, R. Turnbow (RHTC); Choluteca, 19.5 km E Choluteca, Villa Guadalupe, VI-4-93, F. W. Skillman, Jr. (FSCA); Francisco Morazán, Zamorano, X-2-93, F. W. Skillman, Jr. (FSCA); *ibid* R. Turnbow (RHTC); *ibid* XI-27-95; Copán, 16 km Nte. Sta. Rosa de Copán, X-8-93, R. Cordero (RDCC); El Paraíso, vic[inity] Yuscarán, V-18-95, R. Turnbow (RHTC); Yoro, Ocotillo, XII-7-95, R. Turnbow (RHTC); Francisco Morazán, El Zamorano 850 m, I-28-01, C. Cruz & H. Lara (RDCC); El Paraíso, vic[inity] Yuscarán, VII-14-01, R. Turnbow (RHTC); Francisco Morazán, Zamorano, V-13-02, R. Turnbow (RHTC); *ibid* V-22-

- 02; *ibid* V-23-02; *ibid* V-27-02; **Francisco Morazán**, Zamorano, VI-1-03, R. Turnbow (FSCA); *ibid* VI-8-03; **Yoro**, P[arque] N[acional] Pico Pijol, mv + bl, VI-2-03, R. Turnbow (FSCA); **Olancho**, M[onumento] N[acional] El Boquerón, VI-12-03, R. Turnbow (FSCA); **Olancho**, 5 km E Puente Playa Grande, VI-13-03, R. Turnbow (FSCA).
10. *Amblycerus dispar* (Sharp, 1885)  
El Paraíso, Yuscarán, Cerro Monserrat, V-23-93, R. Ortega (RDCC).
11. *Amblycerus dytiscinus* (Sharp, 1885)  
Comayagua, 19 km S Yojoa, V-26-93, R. Turnbow (FSCA).
12. *Amblycerus eustrophoides* (Schaeffer, 1904)  
Olancho, M[onumento] N[acional] El Boquerón, mv + bl, VI-12-03 R. Turnbow (FSCA).
13. *Amblycerus geminatus* (Sharp, 1885)  
El Paraíso, Yuscarán, VII-21-01, R. Turnbow (RHTC).
14. *Amblycerus mariae* Romero, Johnson and Kingsolver, 1996  
La Paz, 8 km N La Paz, VII-21-89, RD Cave (FSCA, RDCC); La Paz, 5.5 km NE La Paz, VII-21-89, RD Cave (RDCC); Cortés, 17 km SE San Pedro Sula, XII-5-95, R. Turnbow (FSCA).
15. *Amblycerus marmoratus* (Sharp, 1885)  
Yoro, Parq[ue] Nac[ional] Pico Pijol, VI-13-14-98, RD Cave (RDCC); *ibid* VII-22-01; *ibid*, R. Turnbow (FSCA); *ibid* VII-23-01 (RHTC); **Yoro**, P[arque] N[acional] Pico Pijol, VI-3-03, R. Turnbow (FSCA).
16. *Amblycerus multiloculus* Kingsolver, 1980  
El Paraíso, Yuscarán, V-18-95, R. Turnbow (RHTC).
17. *Amblycerus nigromarginatus* (Motschulsky, 1874)  
Francisco Morazán, Zamorano, V-23-02, R. Turnbow (FSCA).
18. *Amblycerus obscurus* (Sharp, 1885)  
Santa Bárbara, 3 km N San Marcos, X-21-88, RD Cave (RDCC).
19. *Amblycerus perfectus* (Sharp, 1885)  
[Comayagua], 11 km SW Comayagua, III-23-80, reared seeds *Combretum fruticosum* (FSCA); Comayagua, 3 km S Comayagua, VII-23-89, RD Cave (RDCC); Choluteca, 18 km NE Choluteca, Villa Guadalupe, VI-4-93, R. Cave (EAPZ); Olancho, M[onumental] N[acional] El Boquerón, VI-12-03, R. Turnbow (RHTC).
20. *Amblycerus scutellaris* (Sharp, 1885)  
Francisco Morazán, Cerro Uyuca 1200 m, V-1-99, RD Cave (RDCC); Atlántida, Parq[ue] Nac[ional] Pico Bonito, Río Zacate 35 m, N15°41'35"W86°55'58", III-5-00, Cave, Cordero & Torres (FSCA, RDCC); **Yoro**, P[arque] N[acional] Pico Pijol, mv, V-13-02, R. Turnbow (RHTC); Cortés, Merendón, N15°30'12" W88°11'54", mv, V-18-02, R. Turnbow (RHTC); Copán, 6 km NW San Agustín, mv, V-19-02, R. Turnbow (RHTC); Olancho, Montaña del Malacate, mv + bl, V-23-02, R. Turnbow (FSCA); **Yoro**, P[arque] N[acional] Pico Pijol, mv + bl, VI-2-03, R. Turnbow (FSCA); **Yoro**, Sinaí, 1450 m, mv + bl, VI-4-03, R. Turnbow (FSCA); Santa Bárbara, La Cumbre, VI-7-03, R. Turnbow (FSCA).
21. *Amblycerus serieguttatus* (Chevrolat, 1877)  
Yoro, 7 km S Guaymitas, XI-15-87, RD Cave (RDCC); Santa Bárbara, 3 km N San Marcos, X-21-88, RD Cave (RDCC); **Yoro**, 2 km E El Negrito, VII-23-89, RD Cave (FSCA); Francisco Morazán, El Zamorano 850 m, VI-7-90, R. Cave (EAPZ); Santa Bárbara, San Pedro Zacapa, La Seca, V-30-93, R. Cave (RDCC); Cortés, 10 km NW El Progreso, XII-5-95, F. W. Skillman, Jr. (FSCA); Cortés, 17 km SE San Pedro Sula, XII-5-95, R. ### Conclusions

One hundred forty eight species of Bruchidae are now recorded from Honduras. Of these, 78 species are new records for the country. Fifty-six species (38% of total fauna) known to occur in Honduras are not yet recorded from any of its three neighboring countries. This significantly increases our knowledge of the fauna in Central America and reflects what more needs to be done to catalog the bruchid fauna in the region. Maes and Kingsolver (1991) and Romero and Johnson (2004) recorded 97 species from Nicaragua, of which 29 are not recorded in Honduras. Johnson and Kingsolver (1981), Udayagiri and Wadhi (1989) and Romero and Johnson (2004) cited 113 species

(including *Acanthoscelides pullatus* (Sharp, 1885) = *Acanthoscelides pertinax* (Sharp, 1885)) from Guatemala and 43 species from El Salvador, of which 53 and 11, respectively, are not known to occur in Honduras.

The following 23 unrecorded species may occur in Honduras because they are known to occur in two of the three neighboring countries or they are listed in Johnson and Kingsolver (1981) with general distributions that encompass Honduras (e.g. Central America, Mexico to Costa Rica, Mexico to South America).

*Amblycerus atripes* Pic, 1927

*Amblycerus epsilon* Kingsolver, 1980

*Amblycerus lineolatus* (Motschulsky, 1874)

*Amblycerus luctuosus* (Sharp, 1885)

*Zabrotes achioti* Romero and Johnson 2000

*Zabrotes propinquus* (Sharp, 1885)

*Acanthoscelides griseolus* (Fall, 1910)

*Acanthoscelides obrienorum* Johnson, 1970

*Acanthoscelides ruficoxis* (Sharp, 1885)

*Acanthoscelides sanfordi* Johnson 1983

*Caryedes cavatus* Kingsolver and Whitehead, 1974

*Caryedes clitoriae* (Gyllenhal, 1839)

*Caryedes stictocodius* Kingsolver and Whitehead, 1974

*Caryedes x-liturus* Pic, 1931

*Ctenoculum crotonae* (Fähræus, 1839)

*Gibbobruchus guanacaste* Whitehead and Kingsolver, 1975

*Megacerus (Pachybruchus) reticulatus* (Sharp, 1885)

*Megacerus (Serratibruchus) capreolus* (Jekel, 1855)

*Megacerus (Serratibruchus) contaminatus* (Sharp, 1885)

*Megacerus (Serratibruchus) cubiciformis* (Sharp, 1885)

*Megacerus (Serratibruchus) leucurus* (Sharp, 1885)

*Mimosestes amicus* (Horn, 1873)

*Senniuss atripectus* Johnson and Kingsolver 1973

Therefore, it is apparent that more collecting is needed in order to fully determine the complete bruchid fauna of Honduras.

**Acknowledgements.** For loan of material and access to collections we are indebted to Michael C. Thomas, Florida State Collection of Arthropods. This paper was approved for publication as Florida Agricultural Experiment Station Journal Series No. R-10381.
